1. **Your perceptions of the strengths of this course.** What particular teaching methods or assignments helped you to learn the content or the skills required in this course?

I believe Coral to be a very strong teacher. Her Notes are always exceptional, which is very beneficial to people who prefer to learn their own way and use the notes as a resource. Her organizational skills are also very apparent, as her class flows well.

2. **Your perceptions of the weaknesses of this course.** What particular teaching methods or assignments were not helpful to you in learning? Why not?

My only problem with this course is a subjective one. I believe the pace is a little to slow.

3. **Your opinion of the overall effectiveness of this course.** What suggestions, if any, do you have for helping the instructor to improve the teaching methods and assignments in this course?

No suggestions for teaching Methods or assignments

1. **Your perceptions of the strengths of this course.** What particular teaching methods or assignments helped you to learn the content or the skills required in this course?

I like QGIS since it is interactive. I think this tool helps me learn.

2. **Your perceptions of the weaknesses of this course.** What particular teaching methods or assignments were not helpful to you in learning? Why not?

In week 3 we talked about maps, specifically the angular & distance fidelity of different projections. I still don't fully grasp those concepts, so I would have liked a more in depth explanation.

3. **Your opinion of the overall effectiveness of this course.** What suggestions, if any, do you have for helping the instructor to improve the teaching methods and assignments in this course?

Interesting topic. Good book and interesting assignments.

2. Your perceptions of the weaknesses of this course. What particular teaching methods or assignments were not helpful to you in learning? Why not?

Not much student-student and student-teacher interaction.

3. Your opinion of the overall effectiveness of this course. What sugesstions, if any, do you have for helping the intructor to imporve the teaching methods and assignments in this course?

Largely a do-it-yourself course where the teacher provides the assignments/expectations and it's up to the student to complete the work.

1. Your perceptions of the strenghts of this course. What particular teaching methods or assignments helped you to learn the content or the skills required in this course.

The projects helped me better understand the concepts in the book. The modules also made it easy to see the requirements for each week.

2. Your perceptions of the weaknesses of this course. What particular teaching methods or assignments were not helpful to you in learning? Why not?

The requirements for the projects are very vague. It would be useful if the professor provided sample projects to look at or filmed video walkthroughs of them doing a the project themselves. The external learning materials provided can be difficult to decipher for beginners.

3. Your opinion of the overall effectiveness of this course. What sugesstions, if any, do you have for helping the intructor to imporve the teaching methods and assignments in this course?

I have learned a lot so far, but really had trouble getting started. The course would be more effective if the professor provided tutorials for things like using GIMP, starting projects in Sublime Text, folder organization, and FTPing documents. As a beginner, it was difficult for me to try to figure out these things on my own and I struggled starting and submitting all of my projects because of it.

1. **Your perceptions of the strengths of this course.** What particular teaching methods or assignments helped you to learn the content or the skills required in this course?

It is great that the instructor prepares the entire class notes and make them available. It is super useful and helpful to review these notes to grasp the concepts covered in the class. Only thing I would suggest is to have them available few days earlier than the actual class so that the material can be learned prior to coming to the class.

2. **Your perceptions of the weaknesses of this course.** What particular teaching methods or assignments were not helpful to you in learning? Why not?

It is very challenging to get familiar with coding and be able to code effectively without getting too frustrated. It probably is due to the nature of learning program itself but I wish there are more smaller / simpler practice problems that we can practice rather than 2 challenging homeworks everyweek.

3. **Your opinion of the overall effectiveness of this course.** What suggestions, if any, do you have for helping the instructor to improve the teaching methods and assignments in this course?

Although the content of the class is not easy for a programming beginner, the instructor is doing a great job helping out with thorough class notes and quick responses to the emails. Just wish that the pace of the semester was slower that it is now to make sure to really understand / grasp all the programming concepts.
