*1. Your perceptions of the strenghts of this course. What particular teaching methods or assignments helped you to learn the content or the skills required in this course.*

The textbook seems vague and leaves a lot of gray areas. Professor Sheldon-Hess creates weekly videos to help learn the concepts of the textbook. The videos are very helpful.

*2. Your perceptions of the weaknesses of this course. What particular teaching methods or assignments were not helpful to you in learning? Why not?*

Textbook is not always clear.

*3. Your opinion of the overall effectiveness of this course. What sugesstions, if any, do you have for helping the intructor to imporve the teaching methods and assignments in this course?*

I am learning a lot about Web Development and because of this course I will probably take other related courses. I also will be looking for other classes Professor Sheldon-Hess teaches, she was very helpful.

| 3 | | | | |

*1. Your perceptions of the strenghts of this course. What particular teaching methods or assignments helped you to learn the content or the skills required in this course.*

The course its self is pretty self explanatory. use the textbook and the website builder that comes with it and you wont have ant problems.

*2. Your perceptions of the weaknesses of this course. What particular teaching methods or assignments were not helpful to you in learning? Why not?*

the weakness is the professor. she opts to make everything kind of political with the "online etiquette" quiz and the "respect my pronouns" syllabus. no-one cares that you classify yourself as a "they" and having two major quizzes about that crap serves no real purpose other than to try and indoctrinate us.

*3. Your opinion of the overall effectiveness of this course. What sugesstions, if any, do you have for helping the intructor to imporve the teaching methods and assignments in this course?*

the course works just as intended, however the instructor and her mandatory use of the program "slack" plus the fact that "interaction" is 20% of the grade for an online course just kills it for me. I was looking forward to this course so i could better my understanding and knowledge around html coding but the professor ruined that for me.

| Q26 | Q27 | Q28 | Q29 | Q30 |
|---|---|---|---|---|
| 5 | | | | |

*1. Your perceptions of the strenghts of this course. What particular teaching methods or assignments helped you to learn the content or the skills required in this course.*

The clear structure of this course is great. Blackboard is set up concisely and the format for each week is the same which helps to build expectations and take some of the stress out of online courses. The variety (white board, code walk throughs, live coding) is really great and helps to enhance understanding.

*2. Your perceptions of the weaknesses of this course. What particular teaching methods or assignments were not helpful to you in learning? Why not?*

It's minor, and this is a weakness for all online courses for me. Professor tangents, while helpful in a physical classroom setting to build relationships, seem to really hurt my understanding for online courses. It breaks up the flow and my concentration making it a lot harder to shift my focus back to the topic.

*3. Your opinion of the overall effectiveness of this course. What sugesstions, if any, do you have for helping the intructor to imporve the teaching methods and assignments in this course?*

Very effective course. I would suggest to alternate live coding and independent homework if there's still time at the end of the class. Personally, I feel there's enough of a walk through via Jupyter Notebooks that I don't get anything extra out of the live coding. It would be a more effective use of my time to start on the homework while the professor and other students are there to ask any questions as they come up.

| 4 | | | | |

*1. Your perceptions of the strenghts of this course. What particular teaching methods or assignments helped you to learn the content or the skills required in this course.*

Taking class as a refresher. But went over a few concepts that I have forgotten.

*2. Your perceptions of the weaknesses of this course. What particular teaching methods or assignments were not helpful to you in learning? Why not?*

none. More coding

*3. Your opinion of the overall effectiveness of this course. What sugesstions, if any, do you have for helping the intructor to imporve the teaching methods and assignments in this course?*

Good primer and beginner course for Python. Not too fast and not too slow.

Response 4 DAT-119-NC31 Python 1 02/01/21-05/09/21 S 13:20-16:30 REM ZOOM REM

| 3 | | | | |

*1. Your perceptions of the strenghts of this course. What particular teaching methods or assignments helped you to learn the content or the skills required in this course.*

Strengths are a knowledgeable teacher using a good textbook. This class was ZOOMED because of the pandemic.

*2. Your perceptions of the weaknesses of this course. What particular teaching methods or assignments were not helpful to you in learning? Why not?*

The lectures were too long-winded and caused distraction to concentration, though the material was well-conveyed. Too much SLACK and too much concentration on class participation, in my opinion.

*3. Your opinion of the overall effectiveness of this course. What sugesstions, if any, do you have for helping the intructor to imporve the teaching methods and assignments in this course?*

It is an effective course. Python is taught fairly well. Please stay to the point, and limit digressing on somewhat personal issues. Along with some programming assignments, include some short snippet code-building exercises. I think this teacher is overall quite good and is an asset to the school.

|---|---|---|---|---|
| 2 | | | | |

*1. Your perceptions of the strenghts of this course. What particular teaching methods or assignments helped you to learn the content or the skills required in this course.*

The strengths of this class are that Professor Coral usually starts off explaining what we are doing, and then using blackboard and Jupyter Notebooks to explain new concepts. Alongside with that they also do live coding with us and I think that really helps solidify the material in most cases.

*2. Your perceptions of the weaknesses of this course. What particular teaching methods or assignments were not helpful to you in learning? Why not?*

There are quite a few things about this class that probably could have gone differently. One of the most infuriating things was that we didn't receive grades back on any of our previous tests or assignments in a reasonable time frame, and due to that, we weren't able to learn from our mistakes. Another really frustrating area of the course was the method of communication. Professor Coral makes it very clear they do not want us to email them unless its an emergency, and would rather us learn from each other in Slack messenger. The intentions were good behind this, but the issue was that the atmosphere that was set up where I personally felt like asking a question in Slack felt like a bunch of lost people asking each other for directions. Don't get me wrong Professor Coral definitely came in to save the day, I just dreaded every time I had to ask for help because I didn't understand what others were trying to tell me. Finally, I personally think grading us on participation is really below a college level. It's so unnecessary and just another thing for us to stress about when the class is hard enough as it is.

*3. Your opinion of the overall effectiveness of this course. What sugesstions, if any, do you have for helping the intructor to imporve the teaching methods and assignments in this course?*

Professor Coral knows what they are talking about. 95% of the time I completely understand where they are going with the lesson, and I feel like I am learning. The other 5% is when they are going through the lesson but not explaining what they are doing. Definitely take the time to explain every step and why you are doing it, and this class would be amazing in my opinion!

*2. Your perceptions of the weaknesses of this course. What particular teaching methods or assignments were not helpful to you in learning? Why not?*

Grading not done in a timely manner. In a Zoom only format, this feedback is crucial to knowing how one is doing in the class, and to point out the faults in our code. At this point, week 10, we have no real idea how we're faring.

*3. Your opinion of the overall effectiveness of this course. What sugesstions, if any, do you have for helping the intructor to imporve the teaching methods and assignments in this course?*

Class sessions are thought out prior to us having the class, which is nice.

*1. Your perceptions of the strenghts of this course. What particular teaching methods or assignments helped you to learn the content or the skills required in this course.*

Coral is a much better teacher than I had last time for JavaScript/HTML. They have notes for me and live coding which is extremely resourceful and helps me grasp the content.

*2. Your perceptions of the weaknesses of this course. What particular teaching methods or assignments were not helpful to you in learning? Why not?*

I can't think of much, so not much to report.

*3. Your opinion of the overall effectiveness of this course. What sugesstions, if any, do you have for helping the intructor to imporve the teaching methods and assignments in this course?*

The course is effective for a beginner level course. Thanks for being a good teacher Coral!

*1. Your perceptions of the strenghts of this course. What particular teaching methods or assignments helped you to learn the content or the skills required in this course.*

Always looking for student engagement and asking if we have any questions. Using Slack outside of class helped a lot.

*3. Your opinion of the overall effectiveness of this course. What sugesstions, if any, do you have for helping the intructor to imporve the teaching methods and assignments in this course?*

The overall effectiveness of the class was pretty good. I feel like I have a decent understanding of html and CSS now.

*1. Your perceptions of the strenghts of this course. What particular teaching methods or assignments helped you to learn the content or the skills required in this course.*

The course is well run, and works efficiently with the zoom format. The use of slack for discussion and problem shooting is very helpful

*2. Your perceptions of the weaknesses of this course. What particular teaching methods or assignments were not helpful to you in learning? Why not?*

The only weakness is that technical issues for a students network/system may not be easy to solve since CCAC IT support may not have access to the information needed to help solve an at-home technical issue.

*3. Your opinion of the overall effectiveness of this course. What sugesstions, if any, do you have for helping the intructor to imporve the teaching methods and assignments in this course?*

This course is very effective, and most CIT and DAT courses could be taught with zoom and save people time and money by eliminating travel to a physical campus. This teaching method may not be as helpful for other subjects, but the aforementioned ones work well in the online hybrid format.

*1. Your perceptions of the strenghts of this course. What particular teaching methods or assignments helped you to learn the content or the skills required in this course.*

I have zero complaints about this course. The professor helps us by sharing code directly on screen and also proving when it works for them. They don't expect us to just trust them allow us to ask questions consistently.

*2. Your perceptions of the weaknesses of this course. What particular teaching methods or assignments were not helpful to you in learning? Why not?*

I believe that the course is good in every aspect and each assignment builds on the last one.

*3. Your opinion of the overall effectiveness of this course. What sugesstions, if any, do you have for helping the intructor to imporve the teaching methods and assignments in this course?*

I will be able to continue in the web development field easily because of this course, and the teacher makes me excited to continue on the path I have chose for myself.

*1. Your perceptions of the strenghts of this course. What particular teaching methods or assignments helped you to learn the content or the skills required in this course.*

Reading is assigned before the class meeting so that we can get an idea of what Prof. Coral will be covering. They then cover the material in class. This is extremely helpful in reinforcing the material, and giving students a chance to ask questions if we are still unsure.

*2. Your perceptions of the weaknesses of this course. What particular teaching methods or assignments were not helpful to you in learning? Why not?*

I don't really have any major weaknesses with the class

*3. Your opinion of the overall effectiveness of this course. What sugesstions, if any, do you have for helping the intructor to imporve the teaching methods and assignments in this course?*

I think the course is highly effective. Prof. Coral presents the material in an incredibly accessible way that is easy to understand. They are always willing to re-explain things, work through problems, and help as much as we need.

*1. Your perceptions of the strenghts of this course. What particular teaching methods or assignments helped you to learn the content or the skills required in this course.*

The lab assignments are definitely the most helpful to quickly learn the concepts. Reviewing and looking at other students' assignments is also helpful and lets students to learn from other's mistakes if there are any.

*2. Your perceptions of the weaknesses of this course. What particular teaching methods or assignments were not helpful to you in learning? Why not?*

Everything was helpful.

*3. Your opinion of the overall effectiveness of this course. What sugesstions, if any, do you have for helping the intructor to imporve the teaching methods and assignments in this course?*

No suggestions.
